*What is a vortex? A place where energy goes in and/or out of a system. Examples are earth vortexes, chakras & acupuncture points in our bodies, and galaxies and black holes in the Universe. Scientific experiments have shown that vortex energy moves in a spiraling way (vertere, Latin for spiraling). Earth Vortexes are found in many places around the planet. Sedona has many, and a very large variety of types. When in proximity to these places, you may be affected to varying degrees; some people feel more relaxed and meditative in some spots, or more energized in others.*

**A Sacred Journey with other  
Singles to SEDONA,  
a place full of power  
& special meaning,  
can be an act of transformation  
that can change your life  
in many positive ways!**
